

TORNO Collection

Product sheet — April, 2026

+Halle®

The guiding theme for the TORNO Collection is the mobility. Simple, effortless and without snobbery, the series offers aluminium chairs and tables that are easy to adjust to individual needs. With chairs designed in open configurations, the collection supports self-determined lives, giving the user a range of options for exploiting how they would like to sit —providing a good seating experience, in any airport, café, park or studio.

Designed by Form Us With Love

While renowned for an explorative process, this Swedish studio delivers minimal and improved solutions for everyday objects. Continuously referred to as responsible and critical, the studio's mission is to create design applications based on a circular economy. The studio is famous for challenging typologies of the public realm, positioned between human behaviour and industrial sustainability. This is precisely why; +Halle®'s Annual Briefs on Dwelling, Sharing and Producing were given to the studio.
