Levels

For public spaces not originally built with much flexibility when it comes to dwelling, Form Us With Love has designed a purpose-led, overlapped solution. The Levels collection is a smart bench system, built for a break in the day, between meetings, for a quick lunch, or a short read. Those dwellers might sit in different directions, far apart, and at different eye, levels to create personal space or sit together in groups, either of which allows for an informal and generously sized dwelling foundation.

Design: Form Us With Love

Form Us With Love was founded in 2005 and since its conception, the studio has burned with a passion for design and its democratic potential. Its belief is that we all have a right to meaningful design.

At the studio's core lies a process that blends traditional creative practices with a lean, strategic application. The central intention is to evolve with the needs of each project, its place in the market and the ever-changing needs of real people.

Clarity of purpose

We believe that furniture should have clarity of purpose. This belief informs all of our work as we continue to explore and foster behavioural-led public spaces.
